ABOUT ME

Hi, I'm Sonia!

I'm a backend developer specialising in Java, with four years' experience in web application development. Throughout my career, I've worked on building REST APIs and scalable solutions using Spring Boot, always focusing on best practices such as Clean Code, unit testing and effective version control with Git.

My way of working is based on transparency, responsibility and open communication within the team. I firmly believe that a good product is the result of collaborative and organised work, where every team member contributes value and feels supported. I enjoy working as part of a team, supporting my colleagues and fostering an environment of trust and continuous improvement.

I believe that writing code is not just about making it work, but about making it understandable, testable and maintainable over time. That is why I integrate unit tests as a natural part of the development process and always strive for continuous improvement. I am motivated by constant learning and technological growth. I am currently expanding my knowledge of blockchain and front-end development, convinced that adaptability and curiosity are key to professional growth.

I work with commitment, a positive attitude and a results-oriented mindset, tackling technical challenges with initiative and always seeking to add value to the team and the product.

WORK EXPERIENCE

 **Inetum** – Alicante, Spain

Senior software developer

[19/09/2022 – Current]

Java Backend Developer – Client: Álava Provincial Council and Osakidetza (3 months)

- Development and maintenance of enterprise applications, working primarily with **Java (8 and 11)**, **Oracle** and **SQL Server**.
- Focused on incident **analysis, bug fixing and ongoing application** maintenance.
- Occasional involvement in customisation and the extension of core product functionalities.
- Use and integration of **SOAP services** and collaboration on version management using **Git**.
- Occasional involvement in **front-end tasks using JavaScript**.

Java Backend Developer – Project: Dalion (2 years and 7 months)

- Participation in the development of a digital identity platform based on blockchain technology, working with **Java 17 and later Java 21**, within a highly technically demanding environment.
- Adopted of an **API First** approach, defining service contracts using **OpenAPI (YAML) specifications** and implementing backend logic aligned with those contracts.
- Designed and implemented **RESTful APIs** following a **hexagonal architecture**, developing business logic in decoupled services and ensuring a clear separation between the domain, application and persistence layers.
- Implementation of the data access layer using **Spring Data JPA and Hibernate**, working with **PostgreSQL** and managing relationships, optimised queries and transactional control.
- Integration of **Redis** to optimize performance and **cache management** in critical workflows.

- Development of unit and service tests using **JUnit 5 and Mockito**, ensuring coverage of business logic and validation of complex behaviours.
- Participation in **functional and end-to-end (E2E) testing**, using tools such as **Postman** to validate endpoints and complete business workflows.
- Active contribution to defining best practices, code reviews and continuous improvement of the project, promoting standards of quality and maintainability.
- Development of solid knowledge in digital identity, verifiable credentials, and blockchain fundamentals, applied to backend service implementation.

Java Backend Developer - Project: ETNIC (International) (8 months)

- Participation in the design and implementation of a backend application using **Java 17**.
- Design and development of **RESTful APIs**, applying principles of **hexagonal architecture**, separation of concerns and encapsulation of business logic.
- Development of unit and service tests using **JUnit 5 and Mockito**, applying dependency mocking and validating the behaviour of the business logic.
- Worked in an **Agile (Scrum) environment** with using **GitLab and Git** for version control, reviewing merge requests and tracking tasks on **Jira**, contributing to the continuous improvement of the code and the team's workflow.

 **Accenture** – Alicante, Spain

Business & Integration Arch Associate

[03/2022 – 09/2022]

BPM and Automation - Client: Banking client (International)

- Design and implementation of business logic and process automation using **Appian**.
- Active participation in an international team using the **Agile (Scrum) methodology**.
- Collaboration with technical and functional staff to ensure the correct interpretation of requirements and the successful project objectives.
- Creation and maintenance of technical and functional documentation, ensuring clarity and traceability of implemented solutions.

 **Walcon Virtual** – Alicante, Spain

Graphic designer

[15/03/2020 – 31/08/2020]

- Creation of graphic materials for social media and blog content.
- Design of promotional posters and visual assets for virtual event stands.
- Layout and design of corporate dossiers.

 **JLC Creativos** – Alicante, Spain

Graphic Design Intern

[31/12/2018 – 31/03/2019]

- Support within the creative department.
- Layout and preparation of catalog imagery (product compositions).
- Photo editing for web product content.
- Design of brochures, including tri-folds and bi-folds.
- Conducting market research.

 **A puntadas empresa social** – Alicante, Spain

Graphic designer

[31/05/2018 – 31/08/2018]

- Creation of corporate graphic materials (business cards, merchandising, brochures, etc.).
- Management and creation of company social media content.
- Layout and design of product catalogs.
- Design of advertising materials (posters, roll-ups, displays).

EDUCATION AND TRAINING

Web application development

IES Mare Nostrum [20/09/2020 – 13/03/2022]

Expert in social networks, strategy and digital communication

IES Mare Nostrum [15/09/2019 – 12/03/2020]

Degree in advertising and public relations

Universidad de Alicante [13/09/2015 – 13/06/2019]

LANGUAGE SKILLS

Mother tongue(s): Spanish

Other language(s):

English

LISTENING B2 READING B2 WRITING B2

SPOKEN PRODUCTION B2 SPOKEN INTERACTION B2

Japanese

LISTENING A2 READING A2 WRITING A1

SPOKEN PRODUCTION A1 SPOKEN INTERACTION A1

French

LISTENING A1 READING A1 WRITING A1

SPOKEN PRODUCTION A1 SPOKEN INTERACTION A1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DIGITAL SKILLS

Languages

Java, PHP, C#, .NET, Javascript, React

Database

PostgreSQL, MySQL, Oracle, DBeaver, Microsoft SQL Server

Testing

JUnit 5, Mockito, Postman, SonarQube

Personal skills

Ability to manage deadlines and priorities, remain calm under pressure, be goal-oriented, flexible and keen to continue learning.

Tools and methodologies

Version control: Git, Github, Gitlab, Bitbucket

CI/CD: Jenkins, Nexus, Docker

Collaboration and Agile: Jira, Confluence, Scrum
